Disclaimer

The following presentation and its associated contents contain forward-looking statements regarding operational strategy, financial results and business forecasts, which are based on internal information of the Company and observations of the overall external environment.

Forward-looking statements should not be understood or construed as guarantees of future performance, as such projections involve factors including but not limited to market demand, price fluctuations, competitive situation, global economic activity, foreign exchange rates, and other uncertainties beyond the control of the Company that may cause actual results to differ.

Information presented herein are based upon the Company's assumptions of the future outlook to date, and are not representative, explicit or implicit, of correctness, completeness or reliability. Should there be subsequent changes in circumstances, the Company does not assume any responsibility to update or review forward-looking statements.

The contents of this presentation should not be copied, edited, revised, shared or repurposed in any way without the knowledge or consent of the Company.

SOLOMON

About **SOLOMON**

Founded
in 1973

1000+ employees
100 software engineers

HQ
Taipei ,Taiwan

Public listed in Taiwan
in 1996

Power generation

AI(In-house design)
Robotics(Distribution)

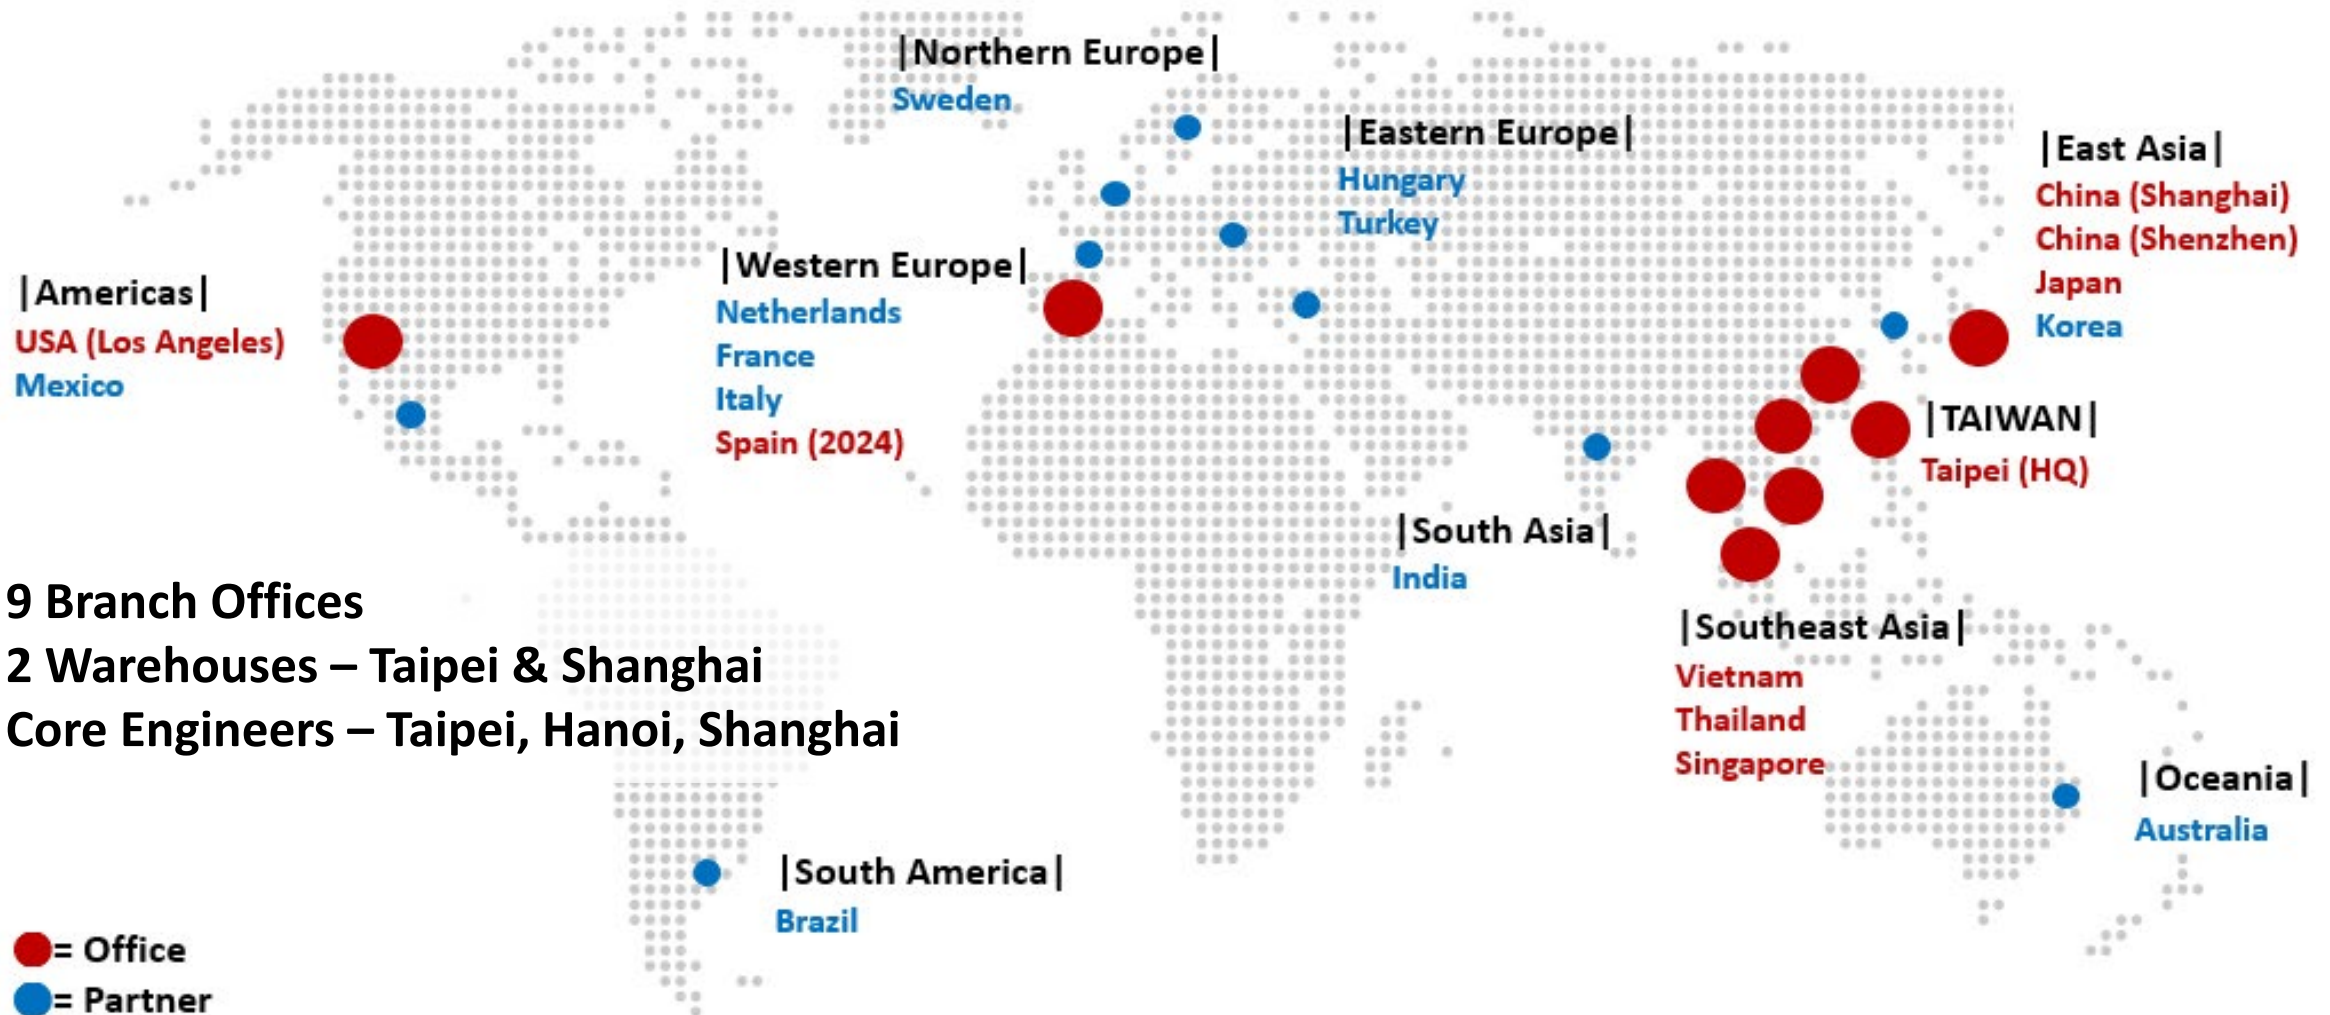

Automation

LCD manufacturing

Geographic Presence

- 9 Branch Offices
- 2 Warehouses – Taipei & Shanghai
- Core Engineers – Taipei, Hanoi, Shanghai

Contact Lens Defect Inspection

- **Types of Contact Lens Defects**
 - Inner and outer defects, air bubbles, cracks, scratches, misalignment, watermarks, residual material, particles
- **Benefits of the SOLOMON Solution**
 - Expands the range of defect detection, overcoming traditional inspection challenges.
 - Improves screening yield by 5-6%, saving product recall costs and enhancing brand reputation.
 - Traditionally, 70% of manpower is dedicated to inspection on production lines; our solution helps clients reduce labor costs.

Chicken Nugget Defect Inspection

- Simultaneously distinguishes defects in different orientations and types (black or brown oil residues, overlapping connections, dark surfaces).
- Combines AOI (Automated Optical Inspection) for precise positioning and uses robotic arms for sorting and removal.

Wind turbine blade component detachment detection

Inspection

| Petrochemistry Chemical Tank Injection SOP Validation

Inspection

1. Verify if **sleepers** are in correct place

2. Confirm the **ground wire** position

3. Confirm the grounding box has **green light on**

➔ Solomon AI employs a **multi-stage safety validation process** across various sections of the factory, in line with the current trend of digital checklists that integrates an electronic internal system.

Assembly Station Time Monitoring

Inspection

SOLOMON AI **monitors the work time** at each assembly station to ensure work efficiency and track product status, while also retaining assembly records.

Meta-aivi

| Airport Apron Management

Inspection

➔ Solomon **AI tracks the duration of operations** such as landing, baggage handling, refueling, air bridge connection, catering replenishment, and others, providing management with data for work efficiency analysis.

Meta-aivi

| Pet Grooming

Translates to "recognizing the body size and coat length of dogs."
